Output in IBM IOT Platform,

The screenshot displays the IBM Watson IoT Platform web interface. On the left, a sidebar contains navigation icons for Browse, Action, Device Types, and Interfaces. The main area shows a table of devices with columns for Device ID, Status, Device Type, and Class ID. Two devices are listed: '40' (Disconnected, node, Device) and 'sk40' (Disconnected, raspberrypi, Device). Below the table, a section titled 'Recent Events' shows a live stream of data from the device 'sk40'. The events are listed in a table with columns for Event, Value, and Format. The events are IoTSensor data points for temperature, humidity, and soil moisture. A terminal window is open in the foreground, showing the command prompt and the output of the 'ibmiotf.device.Client' library, which indicates a successful connection to the IBM Watson IoT Platform.

Device ID	Status	Device Type	Class ID
40	Disconnected	node	Device
sk40	Disconnected	raspberrypi	Device

Event	Value	Format
IoTSensor	["temp":10,"Humid":73,"soilmoisture":92,"Wind...]	json
IoTSensor	["temp":79,"Humid":57,"soilmoisture":14,"Wind...]	json
IoTSensor	["temp":50,"Humid":80,"soilmoisture":13,"Wind...]	json
IoTSensor	["temp":30,"Humid":71,"soilmoisture":39,"Wind...]	json
